

T-3082-ACVW Crank Pump Adapter

Adapter for VW oil pump, Engine with Model A crankshaft. Shaft is full length (flange not altered). This adapter can also be used for splash lube without the pump mounting machine work.

SUGGESTED MACHINING OPERATIONS

- Bore open hole to snug slip fit over rear Model T camshaft bushing. **IMPORTANT** Locate this hole so there will be just a little surface left to match file the gasket surface for the hog's head. And finish surface for the pan gasket.
- Locate, drill and spotface for (4) 3/8 bolts, please pay attention to above.
- Bolt adaptor to block and match file 3 gasket surfaces, (hogshead, 2 oil pan).
- Dismantle VW oil pump. Mount in lathe on face plate Indicate bore to within .001" TIR (Total Indicator Runout Turn snout to just clean up.
- Construct aluminum cover plate.
- Turn up suitable bushing
- Drill and tap 1/4- 20 UNC 4 holes for mounting cover plate and oil pump.
